

# User Guide

Tzu-Hsuan Lin, and Chia-Hsiang Lin<sup>†</sup>

October 9, 2023

## Description

Based on our research paper “Hyperspectral change detection using semi-supervised graph neural network and convex deep learning (CODE-HCD)”, we prepare a demo file for researchers to investigate our theory and algorithm.

## Requirements

- MATLAB: R2021b
- torch: 1.7.0+cu110
- torchvision: 0.8.1+cu110
- numpy: 1.19.2
- scikit-learn: 1.1.3
- scipy: 1.4.1
- scikit-image: 0.19.3

## Run the code

Open MATLAB in the environment that has installed Pytorch. Then, run the Matlab program “main.m” to see the quantitative and qualitative performances of CODE-HCD.

If you want to run this code with your own data, just put the data in the Dataset folder and modify the “load\_data” function in “main.py”, the settings in the config file, and the corresponding part of “main.m”.
